

# ACT REPORT

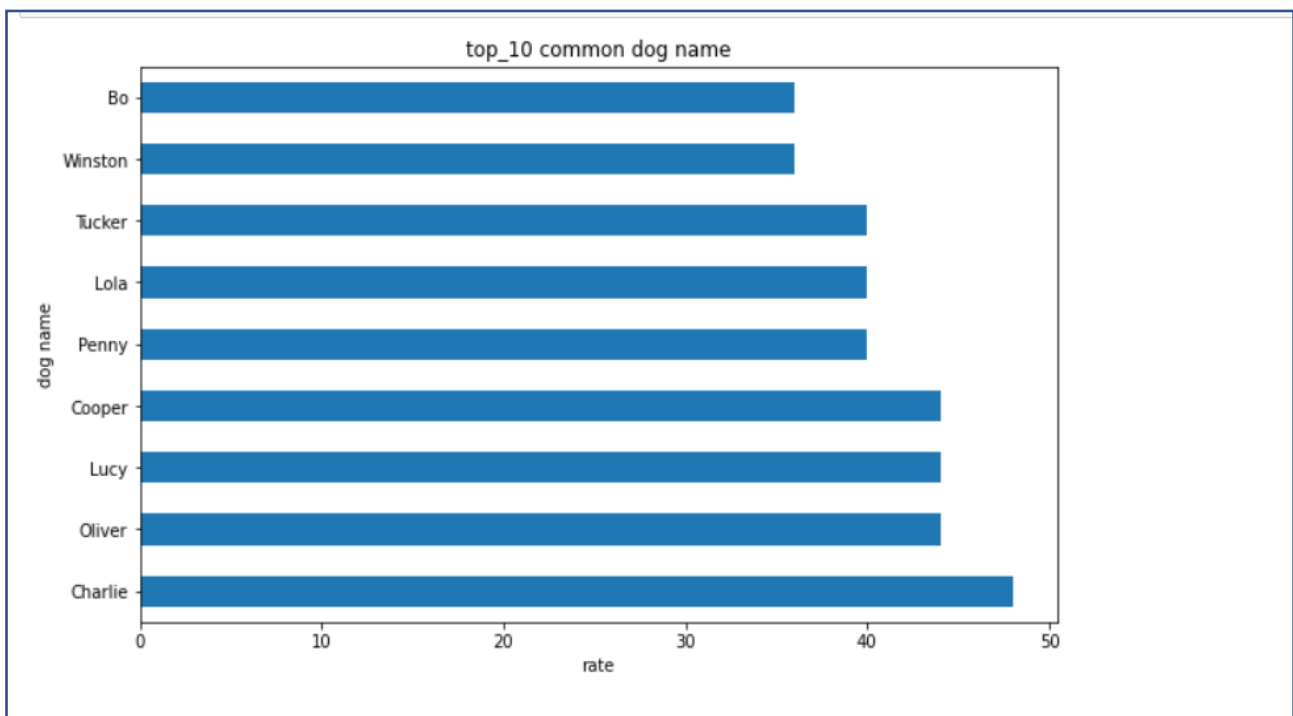

## Data visualization

In order to visualize our data, we set out to answer the four questions below:

### Questions

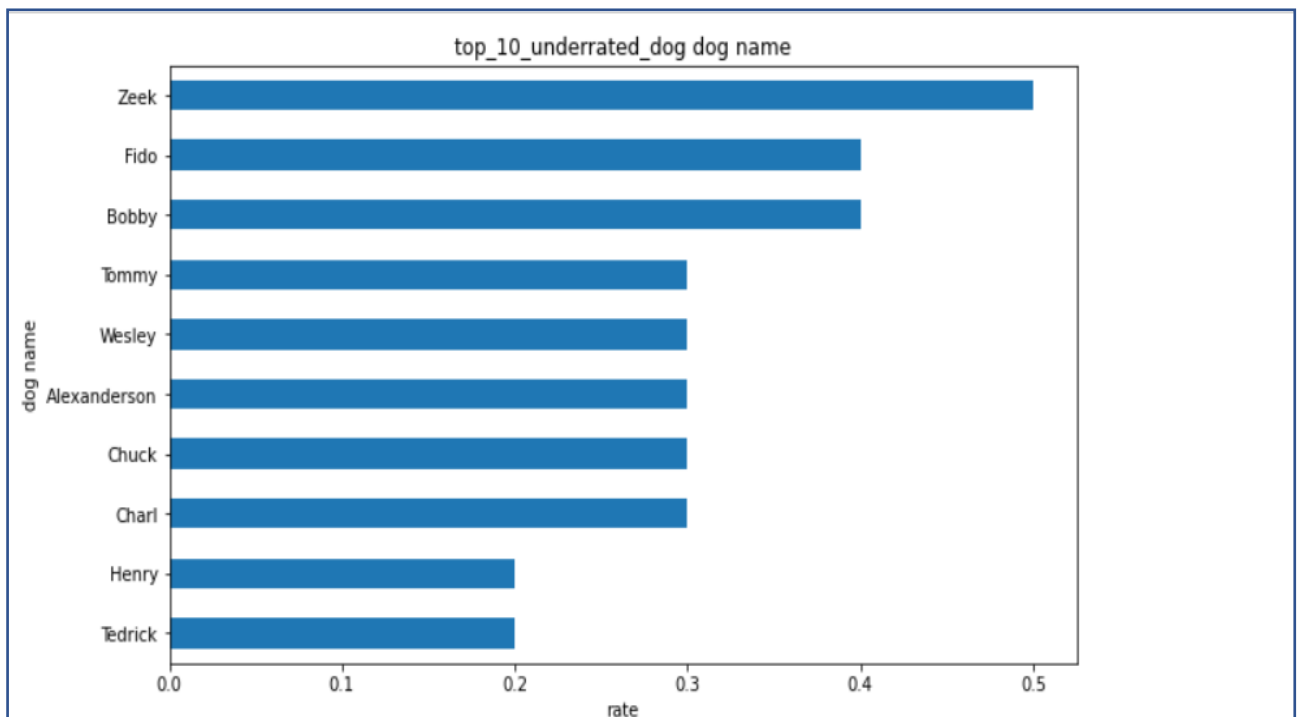

- ❖ 1-top 10 of posted name on WeRateDogs
- ❖ 2-top 10 of underrated dog
- ❖ 3-which post about dogs have been the most retweet?
- ❖ 4-top 10 favorites dog base on favorite\_count

### 1-top 10 of posted name on WeRateDogs

The results of this visualization show that the most posted name on WeRateDogs is Charlie, followed by Oliver, Lucy, Cooper, Penny, Lola, Tucker, Winston, Bo

## 2-top 10 of underrated dog

As an answer to the top 10 most underrated dogs of the site we have zeek ,fido,Bobby,Tommy, Alexanderson , Wesley,Tommy,Bobby,Fido,Zeek.

## 3-which post about dogs have been the most retweet?

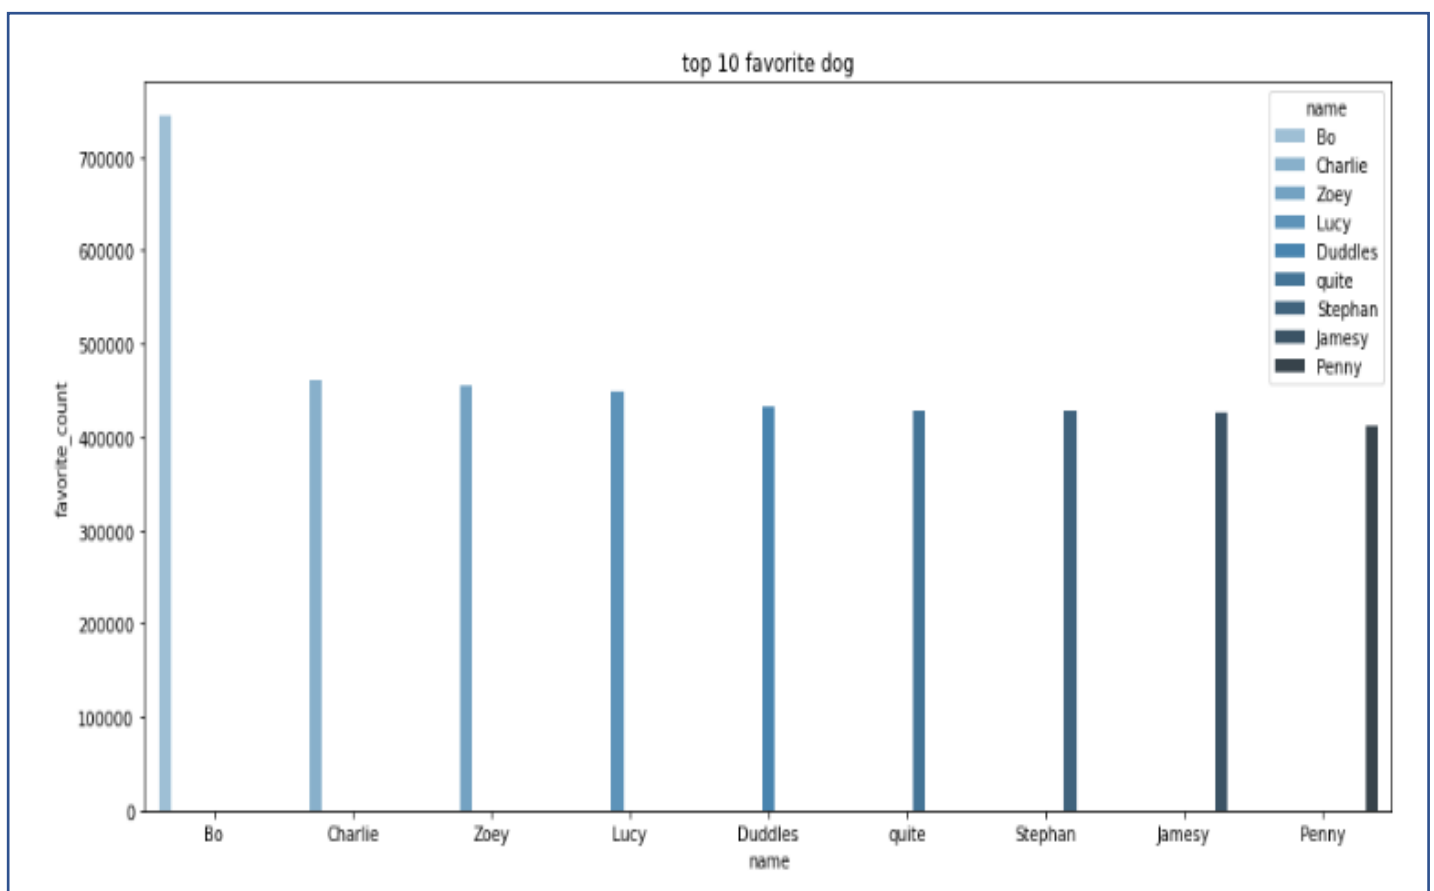

**DoggoLingo**, also referred to as **doggo**, **doggotalk**, **woof**, **wocacop** (web-originating **canine communication protocol**), **bork**, and **dog-speak**, is an Internet language that is created from [word conversion](#), [meme lexicon](#), and [onomatopoeia](#).

Wikipedia definition

On Weratedogs this language is also used so we tried to know what are the types of dogs that come back the most in the posts and we found that it was the pupper, then follows the doggo, puppo and finally puppo

#### 4-top 10 favorites dog base on favorite\_count

Below you can see on the graph the name of the 10 favorite dogs based on the result of the column favorite\_count.

## **Limitations**

- More than half of the posts do not contain the names of the dogs, so we can only consider the result in the context of the WeRateDogs page, not in general.
- Having the sex of the dogs would have allowed us to know the distribution of the dogs in relation to the sex, the preference of the Internet users or any other.
